*This document is prepared for educational purposes only in the information technology course series at Istanbul University, Faculty of Economics. The content includes formulas and functions commonly used in spreadsheet software such as Microsoft Excel, LibreOffice, and Google Sheets, etc. The notes are for those who already participated in the related courses. The source code of this content is available at <https://github.com/jbytecode/sampleddb> in L^AT_EX format.

TRUE
YES

YES
POS

4.5.1 IF...ELSEIF...ELSEIF...ELSE

	A	B	C	D	E	F
1	5	22				
2	7	24				

Write an IF statement to handle this situation:

- If the value in A1 is less than 10, return "LOW"
- If the value in A1 is between 10 and 20 (inclusive), return "MEDIUM"
- If the value in A1 is between 21 and 30 (inclusive), return "HIGH"
- If the value in A1 is greater than 30, return "VERY HIGH"

```
=IF(A1 < 10; "LOW";  
  IF(AND(A1 >= 10; A1 <= 20); "MEDIUM";  
    IF(AND(A1 >= 21; A1 <= 30); "HIGH";  
      "VERY HIGH")))
```

A shorter version:

```
=IF(A1 < 10; "LOW";  
  IF(A1 <= 20; "MEDIUM";  
    IF(A1 <= 30; "HIGH";  
      "VERY HIGH")))
```

The answer is

LOW

Use IFS function (if your Excel supports it):

```
=IFS(A1 < 10; "LOW";  
  AND(A1 >= 10; A1 <= 20); "MEDIUM";  
  AND(A1 >= 21; A1 <= 30); "HIGH";  
  A1 > 30; "VERY HIGH")
```

4.5.2 How many real roots?

	A	B	C	D	E	F
1	-1	5	100			
2	=POWER(B1; 2) - 4 * A1 * C1					

Write an IF statement (indeed they are expressions in Excel) to determine how many real roots the quadratic equation $Ax^2 + Bx + C = 0$ has, based on the values in A1, B1, and C1. Return 0 (No real roots), 1 (repeated root), or 2 (two real roots).

```
=IF(B2 < 0; 0;  
    IF(B2 = 0; 1; 2))
```

Use IFS function (if your Excel supports it):

```
=IFS(B2 < 0; 0;  
     B2 = 0; 1;  
     B2 > 0; 2)
```

4.5.3 How is the weather outside?

Suppose that the temperature is in cell A1 (in degrees Celsius). Write an IF statement to return the following:

- If the temperature is less than or equal to 0, return "Freezing"
- If the temperature is greater than 0 but less than or equal to 15, return "Cold"
- If the temperature is greater than 15 but less than or equal to 25, return "Warm"
- If the temperature is greater than 25 but less than or equal to 35, return "Hot"
- If the temperature is greater than 35, return "Too Hot"

```
=IF(A1 <= 0; "Freezing";  
    IF(A1 <= 15; "Cold";  
        IF(A1 <= 25; "Warm";  
            IF(A1 <= 35; "Hot";  
                "Too Hot"))))
```

Use IFS function (if your Excel supports it):

```
=IFS(A1 <= 0; "Freezing";  
     A1 <= 15; "Cold";  
     A1 <= 25; "Warm";  
     A1 <= 35; "Hot";  
     A1 > 35; "Too Hot")
```

5 Random Numbers

5.1 RAND

	A	B	C	D	E	F
1		=RAND()				
2						

```
// A random number between 0 and 1, e.g.  
0.5432101234
```

5.2 RANDBETWEEN

	A	B	C	D	E	F
1		=RANDBETWEEN(1; 10)				
2						

```
// A random integer between 1 and 10, e.g.  
// The range is inclusive, so 1 and 10 are possible outputs  
7
```

6 Date and Time Functions

6.1 NOW

	A	B	C	D	E	F

8 Visual Basic for Applications (VBA)

8.1 times function

```
' This function returns the product of two numbers
Function times(a, b)
    times = a * b
End Function
```

Usage in Excel:

=times(5; 6)

8.2 factorial function

```
Rem This function returns factorial of n
Function factorial(n)
    Dim result As Long
    Dim i As Long
    result = 1

    For i = 2 To n
```

```

        result = result * i
    Next

    factorial = result
End Function

```

Usage in Excel:

```
=factorial(5)
```

8.3 paraboladelta function

```

Rem This functions returns delta of a given parabola
Function paraboladelta(a As Double, b As Double, c As Double) As Double
    paraboladelta = b * b - 4 * a * c
End Function

```

Usage in Excel:

```
=paraboladelta(1; -3; 2)
```

8.4 numberofroots function

```

' This function returns
' -> 0, if delta < 0
' -> 1, if delta = 0
' -> 2, if delta > 0
Function numberofroots(a As Double, b As Double, c As Double) As Integer
    Dim delta As Double
    delta = b * b - 4 * a * c
    If delta < 0 Then
        numberofroots = 0
    ElseIf delta = 0 Then
        numberofroots = 1
    Else
        numberofroots = 2
    End If
End Function

```

Usage in Excel:

```
=numberofroots(1; -3; 2)
```

8.5 findminimum function

```

' This function returns the minimum of a given range
Function findminimum(r As Range) As Double
    mymin = 9999999

```

```
For i = 1 To r.Count
    If r.Cells(i, 1) < mymin Then
        mymin = r.Cells(i, 1)
    End If
Next
findminimum = mymin
End Function
```

Usage in Excel:

=findminimum(A1:A10)
